

GAMING SYSTEM LICENSE MANAGEMENTAbstract of the Disclosure

A gaming system may include a first gaming unit, a second gaming unit, and a monitoring apparatus operatively coupled to the first and second gaming unit. The monitoring apparatus may include a display terminal and a monitoring apparatus controller operatively coupled to the display terminal. The monitoring apparatus controller may comprise a processor and a memory having encrypted license data representing a license parameter and a corresponding license parameter value stored therein, and may be programmed to determine if the encrypted license data is authentic and may be programmed to determine if a configuration of the gaming system is in compliance with the license parameter value of the license parameter.
